Meet Your Digital Marketing with AI Trainer

Hi, I am Anninder; I started digital marketing back in 2009. I developed interest in it because of youtube and blogging. I wanted to make money online by creating a youtube channel(s) and blog(s). I still remember my first website (blog) name was Ready2blaze. Nothing worked for some years but eventually I created a youtube channel that made me \$1500+ USD and that piqued my interest in this field as a profession.

Introduction: 12 years of specialization in Content, Marketing Communications, and Corporate Communications |
Worked full-time at Deloitte, Google, Wipro, and Tech Mahindra |
Currently a B2B & B2C Freelance Content Writer.

Her Review:

Amninder is a patient trainer with a methodical approach and real insights.

He trained me on Google Analytics, which helped me grasp the concepts, become hands-on with the software, and understand real-time examples. With his notes, videos, and explanatory classes, I became proficient in using GA4 and practiced with level-based exercises. If you are looking to take up his training, I highly recommend Amninder—he is meticulous, makes learning easy, dives deep into subjects, and trains with live examples.

Jiya

Amninder Sir's digital marketing classes are engaging, clear, and highly informative. He has a deep understanding of the subject and explains concepts in a way that is easy to grasp.

His practical examples and personalized approach make learning effective and enjoyable.

Jasmine

I have been a student for the last couple of weeks, and I must say that Amninder is a highly proficient and spontaneous tutor. He understands the basic psyche of what the student is looking forward to learning from the classes. Clarity in concepts and ideas, topped with a fun interactive session in every single class, is what I experienced. What I learned: Social media marketing, Zoho Socials, Meta Business Suite, and other social media strategy concepts.

Training

Approach

Results

My training is designed to transform complete beginners into confident digital marketers through a structured, practical, and easy-to-follow learning experience. Instead of overwhelming you with theory, I guide you through real tools, live dashboards, and hands-on assignments that help you understand how digital marketing actually works. Every concept—whether SEO, Google Ads, Social Media, Funnels, or Content—starts with simple explanations and gradually progresses into real-time implementation. You learn through examples, tasks, and exercises that mimic real industry scenarios. By the end of the program, you won't just understand digital marketing—you'll be able to apply it in real-world situations with clarity and confidence.

My teaching approach is built around simplicity, clarity, and

practicality. I break down even the most complex digital marketing concepts into small, easy steps that anyone can understand. Each class follows a methodical flow—first understanding the “why,” then learning the “how,” and finally practicing the “real application.” I combine teaching with guided practice, personalised feedback, real-time demonstrations, and regular assessments to ensure consistent improvement. Whether you are preparing for a job, growing your business, or learning for personal skill-building, I tailor the sessions according to your goals. My aim is not just to teach digital marketing but to build your confidence, problem-solving ability, and strategic thinking.

The results of this training go far beyond just gaining knowledge—students walk away with real, measurable skills and practical experience that make them industry-ready. You will have the clarity to plan strategies, run ads, analyse data, improve content, grow social media pages, and manage SEO with confidence. Many of my students have used these skills to grow their online businesses, secure internships, get freelance clients, and even land full-time digital marketing roles. Throughout the training, you will also build your own portfolio of work—assignments, campaigns, creatives, and strategy plans—which helps you stand out in interviews and real-world opportunities. By the time you complete the course, you’ll have both the knowledge and the practical expertise to deliver meaningful digital results.

Personalized Learning

Learn digital marketing through real-world tasks, live tools,

and hands-on execution. Instead of memorizing theory, you'll work on SEO audits, ad campaigns, content strategies, and analytics dashboards that mirror actual industry work. Every concept is connected to a practical activity so you gain the confidence to perform on your own, whether you want a job, start freelancing, or grow a business.

Practical Expertise

Training is entirely built around real-world practice. You work on live tools, real examples, campaign structures, analytics dashboards, and actionable marketing strategies. Instead of memorizing theory, you gain hands-on experience that mirrors exactly what companies and clients expect in the real world. By the end of the program, you'll know how to plan, execute, and optimize digital marketing tasks with professional-level confidence.

Take the next step in your learning journey with personalised training that makes digital marketing easy to understand.
