

TubeBuddy Detailed Review By Amninder Singh

[TubeBuddy](#) is one of the best YouTube channel management softwares that I have used for a long time.

Just like any other software, there are many features in TubeBuddy, the best one as per to me is, it helps you **keep track** of all the needed best video SEO practices.

Uploading a High Quality Thumbnail for a youtube video is just one good practice. There are others too. for eg. adding relevant end-screens and **keywords and hashtags** and the list goes on.

TubeBuddy helps you see all of them and do the relevant things in an hassle free way.

When you **optimize your videos** for SEO with or without TubeBuddy, you're going to generate results.

Now results for you could be branding, ad revenue or maybe affiliate sales.

TubeBuddy congratulates you when you achieve results, when you reach milestones. Eg: 10,000 Subscribers Milestone, 50K Subscribers Milestone...

And eventually when you reach 100K subscribers with the TubeBuddy Software then Youtube awards you the 'Silver Play Button'!
